SUMMARY

Front-End | Flutter Developer | Angular | Flutter | Building Scalable Web & Mobile Apps

Front-End & Flutter Developer with **2.5+** years of professional experience, helping businesses and individuals build scalable web and mobile applications. I specialize in **Angular, Next.js, Tailwind CSS, and Flutter**, delivering clean, high-performance solutions with a strong focus on **UI/UX, scalability, and maintainability**. As a **freelancer**, I work closely with clients to transform ideas into reliable digital products that drive real value.

WORK EXPERIENCE

Aug 2023 – Nov 2025

FLUTTER & FRONT-END DEVELOPER, Paperfox Technologies

As a **Flutter & Front-End Developer** at **Paperfox Technologies**, I gained hands-on experience in **building responsive and high-performance web applications** using **Angular**, and developing cross-platform **Android mobile apps with Flutter**. Collaborated closely with cross-functional teams to ensure code quality, performance, scalability, and UI consistency across projects.

FREELANCE FRONT-END DEVELOPER **Dec 2025 – Present**

Working as a **Freelance Front-End Developer**, specializing in **building modern, scalable, and responsive websites for businesses, startups, and personal brands**. Experienced in developing web applications using Angular, Next.js, and Tailwind CSS, focusing on performance optimization, clean UI, and seamless user experience. Responsible for end-to-end development, from design implementation to deployment and maintenance.

FRONT-END PROJECTS WITH API INTEGRATION – PAPERFOX TECHNOLOGIES

Postcargo **Dec 2023 - Feb 2024**

As a Front-End Developer, I contributed to the **Postcargo** project, a modern web application designed to streamline cargo and logistics services. I developed a user-friendly interface for managing shipments, enhancing the customer experience, while integrating APIs for seamless data interaction between the front-end and back-end systems.

Azerpost **Jan 2024 - Jun 2024**

As a Front-End Developer on the **Azerpost** project, I played a key role in developing and enhancing the digital platform for Azerbaijan's national postal service. I focused on modernizing the user experience for both postal employees and customers, integrating front-end interfaces with back-end APIs to ensure seamless data flow and real-time updates.

Ship2myId (REPORTS MODULES) **Jun 2024 - Aug 2024**

As a Front-End Developer, I was responsible for developing and enhancing the reports page within the **Ship2myId** project. This module aimed to provide comprehensive and actionable insights to users, helping them manage and analyze shipping data effectively. I worked on creating a user-friendly and responsive interface using Angular, while integrating it with back-end APIs to fetch real-time shipping data.

SUPERADMIN-PORTAL **Aug 2024 - Oct 2024**

As a Front-End Developer for the **SuperAdmin Portal**, I was responsible for designing and implementing the user interface, ensuring a seamless and intuitive experience for managing administrative tasks. I collaborated closely with the back-end team to integrate APIs, allowing efficient data flow between the front-end and back-end systems.

EzyCampus (Admin Dashboard) **Oct 2024 - Nov 2024**

As a Front-End Developer for the **EzyCampus** project, designing and developing the admin dashboard interface. I collaborated closely with the back-end team to integrate APIs, allowing efficient data flow between the front-end and back-end systems.

SINGLE-PAGE WEBSITES – PAPERFOX TECHNOLOGIES

Dec 2024 - Feb 2025

Designed and developed **multiple single-page, responsive websites** at **Paperfox Technologies** during the period from **December 2024 to February 2025**, alongside ongoing projects. Successfully delivered platforms including **Dreami Foundation (education platform), RDB, SANMBA College, CHIT-FUNDS (Agent/Admin Frontend), Paperfox Technologies (corporate website), Swiftor (SaaS Cloud Fleet & Delivery Management Software), and EzyFace (facial recognition–based identity verification solution)**. Focused on creating modern, visually engaging, and user-friendly interfaces with seamless navigation and optimized performance. Implemented reusable UI components, interactive sections, and RESTful API integrations where required, ensuring cross-device compatibility, scalability, and enhanced user engagement while managing multiple projects simultaneously.

FLUTTER MOBILE APPLICATION PROJECTS – PAPERFOX TECHNOLOGIES

Ezycampus Parent app **Mar 2025 - Jun 2025**

Developed and released the **EzyCampus Parent App** on the **Google Play Store** using **Flutter** and **Dart**. This Android application enables **parents** to easily track student-related information such as **attendance, homework, timetables, and notifications.** Focused on delivering a smooth user experience, responsive UI, and seamless performance. The app is designed for scalability and cross-platform readiness, currently available for Android users via the Play Store.

Ezycampus Staff app **Jun 2025 - Dec 2025**

Developed and launched the **EzyCampus Staff App** using Flutter and Dart, **primarily targeting the web platform**. The web version features a fully set up and functional home page, with additional modules currently under active development. An **early access Android version is also available on the Google Play Store**. The application is **designed for staff members** to manage and **monitor student information, attendance, schedules, and notifications**, with a focus on responsive UI, smooth performance, and scalability for cross-platform use.

FREELANCE FRONT-END DEVELOPMENT PROJECTS

Indrio Automation Website

Designed and developed the **front-end website using Angular** for Indrio Automation, an automation solutions company based in Coimbatore. Built a **modern, responsive, and user-friendly web interface** to showcase the company's services, expertise, and brand presence. Focused on clean UI design, smooth navigation, and cross-device compatibility to ensure a strong online presence.

- Configured domain management via **GoDaddy**.
- Implemented **Cloudflare** for **hosting, security, and performance optimization**.
- The project was successfully deployed, strengthening the company's online visibility and accessibility.

Jaja Finex Website

Designed and developed the **front-end web application** for Jaja Finex, a trading company, using **Next.js with React components and Tailwind CSS**. Built a **modern, responsive, and performance-optimized interface** to showcase trading services, market insights, and the company's digital presence. Focused on clean UI/UX design, smooth navigation, and cross-platform compatibility to ensure seamless user experience across devices.

- Configured domain management via **GoDaddy**.
- Implemented **Cloudflare** for **hosting, security, and performance optimization**.
- The project was successfully deployed, strengthening the company's online visibility and accessibility.
