SUMMARY

Angular Front-End & Flutter Developer | Building Scalable Web & Mobile Apps

Front-End & Flutter Developer (Aug 2023 – Present) with **2+ years of experience** in building responsive web and mobile applications. Proficient in **Angular (TypeScript)** for creating dynamic, API-integrated web apps and **Flutter (Dart)** for developing high-performance Android mobile apps focused on scalability, and seamless user experience.

WORK EXPERIENCE

FLUTTER & FRONT-END DEVELOPER, Paperfox Technologies **Aug 2023 - Present**

As a Flutter & Front-End Developer at **Paperfox Technologies**, I have hands-on experience in building responsive and high-performing web applications using **Angular**, and developing **cross-platform Android mobile apps** with **Flutter**. Collaborated closely with the development team to maintain **code quality, performance, and UI consistency** across projects. Proactively identified and resolved front-end issues to enhance **scalability, and overall user experience.**

EDUCATION

Bachelor of Engineering in Mechanical Engineering **Aug 2018 - Jul 2022**

Nandha College of Technology, Erode

PROJECTS

Postcargo **Dec 2023 - Jan 2024**

As a Front-End Web Developer, I contributed to the **Postcargo** project, a modern web application designed to streamline cargo and logistics services. I developed a user-friendly interface for managing shipments, enhancing the customer experience, while integrating APIs for seamless data interaction between the front-end and back-end systems.

Azerpost **Jan 2024 - Apr 2024**

As a Front-End Web Developer on the **Azerpost** project, I played a key role in developing and enhancing the digital platform for Azerbaijan's national postal service. I focused on modernizing the user experience for both postal employees and customers, integrating front-end interfaces with back-end APIs to ensure seamless data flow and real-time updates.

Fastkart Web App **May 2024 - Jun 2024**

As a Front-End Web Developer , I played a key role in developing the **Fastkart Web App** an e-commerce platform designed to provide a seamless online shopping experience for customers. This project focused on creating an intuitive and responsive interface for browsing, purchasing, and managing products.

Ship2myId (REPORTS MODULES) **Jun 2024 - Jul 2024**

As a Front-End Web Developer, I was responsible for developing and enhancing the reports page within the **Ship2myId** project. This module aimed to provide comprehensive and actionable insights to users, helping them manage and analyze shipping data effectively. I worked on creating a user-friendly and responsive interface using Angular, while integrating it with back-end APIs to fetch real-time shipping data.

Dreami Foundation Website **Jul 2024 - Aug 2024**

As a Front-End Web Developer, I was instrumental in designing and developing the user interface for the **Dreami Foundation Website** a platform dedicated to supporting and promoting educational initiatives. My role focused on creating a visually appealing, intuitive, and responsive web interface that effectively conveyed the foundation's mission and engaged visitors

SUPERADMIN-PORTAL **Aug 2024 - Oct 2024**

As a Front-End Developer for the **SuperAdmin Portal**, I was responsible for designing and implementing the user interface, ensuring a seamless and intuitive experience for managing administrative tasks. I collaborated closely with the back-end team to integrate APIs, allowing efficient data flow between the front-end and back-end systems.

EzyCampus (Admin Dashboard) **Oct 2024**

In October, I worked on the **EzyCampus** project as a Front-End Developer, designing and developing the admin dashboard interface. Half of the API integrations are completed, and the remaining are in progress to ensure seamless real-time updates and interactions for administrators.

EzyCampus (Student Portal) **Nov 2024**

I am also working on the front-end development of the **EzyCampus** student portal, creating an intuitive and user-friendly interface to enhance the student experience. API integration is pending to enable dynamic content and functionality.

RDB Website **Dec 2024**

I worked on the front-end development of the **RDB Website**, ensuring a responsive and visually appealing interface. The design focuses on seamless user experience across all devices.

SANMBA Website **Jan 2025**

As a Front-End Developer, I designed and developed the user interface for the **SANMBA** College website, ensuring a responsive and visually engaging experience across all devices. I focused on developing dedicated components for faculty profiles, campus information, and event listings, improving accessibility and user engagement.

Ezypeople Landing **Jan 2025**

As a Front-End Developer, I designed and developed the user interface for the **EZYPEOPLE** Landing website, a **single-page application** (SPA) ensuring a seamless and visually engaging experience across all devices.

Agent Frontend (CHIT-FUNDS website) **Feb 2025**

As a Front-End Developer, I designed and developed the **Agent Frontend** for the CHIT-FUNDS website, focusing on an intuitive and responsive **ADMIN PANEL**.The project involved integrating RESTful APIs to manage customers, chit groups, transactions, and agent records efficiently.

Paperfox Technologies website **Feb 2025**

As a Front-End Developer, I designed and developed the website for **Paperfox Technologies,** ensuring a modern, responsive, and user-friendly experience.I integrated dynamic elements, optimized performance, and implemented seamless navigation to enhance user engagement.

Swiftor Website **Mar 2025**

As a Front-End Developer, I designed and developed the **Swiftor** website, a SaaS Cloud Fleet & Delivery Management Software. I focused on creating a modern, responsive, and user-friendly interface that effectively showcases Swiftor's features, including real-time fleet tracking, route optimization, automated dispatch, and delivery management.

Ezyface Website **Apr 2025**

As a Front-End Developer, I designed and developed the **EzyFace** website — a single-page application showcasing a facial recognition-based solution for identity verification and access control. The site features a modern, responsive, and visually engaging layout, highlighting EzyFace's capabilities through clean UI components, and interactive sections.

Ezycampus Parent app **Apr 2025 - Jun 2025**

Developed and released the **EzyCampus Parent App** on the **Google Play Store** using **Flutter** and **Dart**. This Android application enables **parents** to easily track student-related information such as **attendance, homework, timetables, and notifications.** Focused on delivering a smooth user experience, responsive UI, and seamless performance. The app is designed for scalability and cross-platform readiness, currently available for Android users via the Play Store.

Ezycampus Staff app **Jun 2025 - Present**

Developed and launched the **EzyCampus Staff App** using Flutter and Dart, **primarily targeting the web platform**. The web version features a fully set up and functional home page, with additional modules currently under active development. An **early access Android version is also available on the Google Play Store**. The application is **designed for staff members** to manage and **monitor student information, attendance, schedules, and notifications**, with a focus on responsive UI, smooth performance, and scalability for cross-platform use.

ADDITIONAL INFORMATION

- **Technical Skills:** Front-End Development, Angular Framework, API Integration, HTML, CSS, TypeScript, Bootstrap, Responsive Design, Flutter Framework, Dart, Version Control (GitLab)
- **Languages:** English, Tamil
- **Certifications:** Angular Course Completion, Selenium Testing Course Completion
