PRASANNA S

Full-Stack Developer | Angular | Next.js | Java | Spring Boot | Flutter

Phone: +91 6383087278

Email: prasannajayanth3107@gmail.com

Portfolio: https://prasanna-eyv.pages.dev/

SUMMARY

Full-Stack Developer with **3+ years of experience** in web application development. Skilled in Angular, Next.js, Java, Spring Boot, and Flutter with experience in building responsive user interfaces, developing backend APIs, and integrating RESTful services. Worked on ERP systems, customer ordering platforms, and inventory management applications.

TECHNICAL SKILLS

Frontend Development: Angular, Next.js, React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design

Backend Development: Java, Spring Boot, RESTful APIs, Backend Business Logic, API Integration

Mobile Development: Flutter, Dart, Cross-Platform Application Development

Development Tools: Git, GitHub, GitLab, Postman

Core Competencies: Full-Stack Web Development, UI Component Development, API Integration, Application Debugging, Performance Optimization, Responsive Design, Version Control, Agile Collaboration

PROFESSIONAL EXPERIENCE

U2 BREAKTHROUGH TECHNOLOGY PRIVATE LIMITED

Full-Stack Developer | February 2026 – Present

- Develop and maintain full-stack web application modules using Angular, TypeScript, Java, and Spring Boot.
- Build responsive frontend interfaces and reusable UI components for enterprise applications.
- Integrate RESTful APIs to enable communication between frontend applications and backend services.
- Contribute to backend API development, business logic implementation, request validation, and data processing using Java and Spring Boot.
- Work on enterprise workflows involving inventory management, order processing, operational tracking, and administrative functions.
- Develop and enhance application features based on business requirements, ensuring maintainability, usability, and performance.
- Debug frontend and backend issues, validate API responses, and support application testing and deployment activities.
- Use AI-assisted development tools to support implementation, debugging, and code improvement while reviewing generated code.

KEY PROJECTS

1. Megha ERP – Gold Manufacturing and Process Management

Technologies: Angular, TypeScript, API Integration

- Developed and enhanced Angular frontend modules for the Megha ERP application.
- Built responsive user interfaces for gold manufacturing, inventory tracking, and process management.
- Integrated REST APIs to fetch, display, and update application data.
- Developed reusable UI components to improve consistency and usability.
- Fixed UI issues and improved frontend performance.

2. Jamindhar – Hostel Allocation and Facilities Management

Technologies: Next.js, React, Flutter, Java, Spring Boot, REST APIs

- Developed responsive web UI modules using Next.js and React for a hostel management application.
- Developed mobile application screens and features using Flutter.
- Implemented interfaces supporting room allocation, occupancy tracking, and hostel facilities management.
- Integrated REST APIs across web and mobile applications to retrieve, display, and update application data.
- Built reusable React components and maintained consistent UI and data presentation across web and mobile platforms.
- Improved application usability through responsive layouts, structured UI components, and efficient API integration.

3. iPickup – Customer Ordering and Vendor Pickup Management Platform

Technologies: Next.js, React, Flutter, Java, Spring Boot, REST APIs

- Contributed to the development of a customer-facing ordering and vendor pickup management platform for web and mobile applications.
- Developed and enhanced customer web application features using Next.js and React, including product discovery, product details, search, cart, orders, and account management.
- Developed customer mobile application features using Flutter, ensuring a consistent and responsive experience across platforms.
- Developed and integrated REST APIs using Java and Spring Boot to support product, customer, order, vendor, subscription, and pickup-related functionality.
- Integrated frontend web and mobile applications with REST APIs for data retrieval, order placement, order management, and real-time application workflows.
- Implemented subscription-based product ordering with daily, weekly, and monthly schedules and preferred pickup times.
- Developed features for location search, product availability, pickup date and time selection, and vendor-specific product and order management.
- Contributed to frontend and backend integration across customer, vendor, and platform services to support end-to-end ordering and pickup workflows.

PAPERFOX TECHNOLOGIES

Front-End & Flutter Developer | August 2023 – November 2025

- Developed responsive web applications using Angular, TypeScript, HTML, CSS, and Bootstrap.
- Built reusable frontend components and integrated REST APIs to connect user interfaces with backend services.
- Developed cross-platform mobile application features using Flutter and Dart.
- Collaborated with cross-functional teams to implement business requirements, improve UI consistency, and resolve application issues.
- Optimized frontend functionality for responsiveness, usability, and performance across devices.

KEY PROJECTS

1.Postcargo – Cargo and Logistics Management

- Developed responsive user interfaces for shipment and logistics-related workflows.
- Integrated APIs to support data exchange between frontend modules and backend services.

2.Ship2myId – Reports Module

- Developed Angular-based reporting interfaces for viewing and analyzing shipping data.
- Integrated backend APIs to retrieve and display report information.

3.SuperAdmin Portal

- Developed administrative interfaces for managing platform operations.
- Integrated APIs to support data retrieval and administrative workflows.

4.EzyCampus – Admin Dashboard

- Built responsive dashboard interfaces using Angular.
- Integrated REST APIs for displaying and managing application data.

Single-Page Websites

- Developed responsive websites and frontend interfaces for **Dreami Foundation, RDB, SANMBA College, CHIT-FUNDS, Paperfox Technologies, Swiftor, and EzyFace.**
- Implemented reusable components, interactive sections, responsive layouts, and API integrations where required.

Flutter Mobile Applications

- Contributed to the development and enhancement of mobile applications using Flutter for the Azerpost digital platform and **EzyCampus Parent and Staff applications**, developing responsive interfaces for different modules and user roles.
- Implemented features including student information, attendance tracking, timetables, homework, announcements, notifications, navigation, forms, and data presentation.
- Integrated REST APIs with mobile applications, developed reusable UI components, and worked on UI improvements, bug fixes, and feature enhancements to improve usability and application performance.

FREELANCE FRONTEND DEVELOPMENT

Freelance Front-End Developer | December 2025 – January 2026

- Developed responsive business websites using Angular, TypeScript, HTML, and CSS.
- Implemented user-friendly interfaces, reusable components, and responsive layouts.
- Configured domains, deployment, hosting, and performance-related settings for client websites.

KEY PROJECTS

1.Indrio Automation Website — https://www.indrioautomation.com/

- Developed a responsive Angular website showcasing company services and automation solutions.
- Configured domain management and supported deployment using Cloudflare.

2.Jaja Finex Website — https://www.jajafinex.com/

- Developed a responsive Angular website presenting trading services and company information.
- Implemented cross-device layouts and supported domain and deployment configuration.
